

## **Furnace Creek Route Designation**

Initial range of alternatives includes:

**Alternative 1:** Designating all 2 miles as open to vehicle use up to the BLM/USFS boundary.

**Alternative 2:** Designating 1.5 miles open to a small bench in the canyon narrows on the south side of the stream channel.

**Alternative 3:** Designating 0.5 miles open from the intersection of two approach routes off of Highway 264 to the currently closed vehicle barrier near the mouth of the canyon.

**Alternative 4:** No Action. Leave all 2 miles undesignated under NEMO. This would prevent vehicles from accessing the mouth of the canyon.
